NIVEUS MEDIA AND AUTONOMIC CONTROLS PROVIDE INDUSTRY-WIDE MEDIA CENTER CONTROL COMPATIBILITY

Support for major control systems enables the integration of Niveus Media Servers into more advanced whole-home installations.

Denver, CO – CEDIA Expo 2007 – September 5-9 – Booth #294 – Niveus Media, Inc., award-winning manufacturer of hardware and software digital entertainment solutions, and Autonomic Controls™ (Booth #3806), exclusive provider of A/V integration software for Windows Vista, have joined forces to provide custom installers with two-way, IP or serial based control of Niveus Media Centers.

Autonomic Controls' Media Control Server (MCS) acts as a bi-directional communications gateway between Windows Media Center or Windows Media Player and touch panel remote control devices capable of IP or serial communication such as those made by Crestron, AMX, and RTI. Pre-built modules and touch panel interfaces are available for AMX, Crestron, and HAI control systems. A specially designed version of the control protocol was engineered exclusively for Niveus and will be pre-loaded on all Niveus' Media Centers including the passively cooled Summit Series Rainier and Denali Editions and the rack-mountable Pro Series n4, n7, and n9. Niveus Media Centers can also be controlled from UMPCs and other computers on the network by using Autonomic Controls' Mirage Flash™ interface.

Niveus dealers will be automatically enrolled in Autonomic Controls' dealer pricing and support program. Installers will also be able to offer two week trials of the control software to their clients who can test the application after the system has been installed; helping to boost post-installation upgrades.

Niveus' Media Centers with Autonomic Controls' technology provide a cost effective yet hyper-functional whole-house solution for the ultimate in multi-zone audio and video entertainment while providing a robust touch panel interface for browsing and managing the Media Center's content library. Niveus and Autonomic Controls together give dealers the resources and

flexibility to pair the ultimate high-performance Niveus Media Server and Media Center Extenders with the optimum home automation solution from *any* control vendor.

Niveus Media's 2008 line of Windows Vista Ultimate-based media centers including the Summit Series Rainier and Denali Editions, and Pro Series n4, n7 and n9, are capable of storing, managing, and playing TV, music, movies, and photos while offering the highest level of media center performance.

About Niveus Media, Inc.

Since 2002, Niveus Media, Inc. has engineered and manufactured high-performance media solutions that take whole-home digital entertainment to an entirely new level. Niveus is an award-winning manufacturer of high-end Media Centers, storage servers, and advanced control software designed specifically for the consumer electronics market. Committed to providing innovative, integrated digital entertainment devices for the networked home, Niveus has simplified the management and enjoyment of digital media at home.

About Autonomic Controls, Inc.

Autonomic Controls, Inc. specializes in developing products that help the custom electronics dealer integrate Media Center into their A/V installations. Using their innovative IP and RS-232 control protocols, they have developed software that makes Media Center a two way controllable device. Prebuilt control modules for the most popular control systems get integrators up and running quickly.
