NIVEUS MEDIA ANNOUNCES PRO SERIES - n9 BASED ON INTEL® CORE™ 2 EXTREME QUAD PROCESSOR WITH NEW LEVELS OF PERFORMANCE AND EFFICIENCY

Now shipping with Intel's newest desktop processor, Niveus' high-performance rack-mount media server delivers a high fidelity high definition experience throughout the home.

Milpitas, CA – November 14, 2006 – An award-winning designer and manufacturer of media servers based on the Windows Media Center platform, Niveus Media announces the company's 2007 Pro Series - n9 media server is now shipping with the new Intel® Core™ 2 Extreme quad core processor QX6700. Continuing to solidify the company's reputation by incorporating only the most innovative hardware and software in their products, Niveus' n9 offers a powerful, multi-zone digital entertainment solution; all in a convenient rack-mount form factor.

Achieving unprecedented speed and performance across a wide range of multimedia and multi-zone applications, the quad core processor joins the Pro Series' already impressive list of features, including Intel® Viiv™ technology, Nvidia's GeForce Series 7 Graphics, and 3 terabytes of storage. Intel's new quad core processor provides four independent cores with dedicated threads, to efficiently off-load tasks, thereby freeing the other processor; maximizing the Niveus Media Center's effectiveness in serving up media to multiple rooms of the house.

Enabling simultaneous local HD DVD playback, and multiple, independent sessions of HD television and music playback throughout various zones, amongst other functionality, the n9 with quad core processor offers the power, compatibility, and connectivity to perform as a central media hub. Maintaining faster frame rates and improved acoustics leveraging the quad core processors platform thermal control, the n9 delivers a higher performance audio video experience.

"Intel's Core 2 Extreme quad core processor provides boundless opportunity for the Niveus Media Center," says Greg Pearson, Vice President, Sales and Marketing Group and President,

Intel Americas, Inc. *“The n9 is a fast and innovative solution targeted at media enthusiasts, and we are proud of Niveus’ commitment as an Intel channel partner.”*

Niveus’ Pro Series is housed in a sleek, compact chassis (measuring 3U) with ears for fast and easy rack mount installation. In addition to being Windows Vista Capable and CableCARD Ready, features include: Niveus’ patent-pending Niveus ConvergencePanel™; HDMI; RS-232; an integrated flash card reader (SD, MMC); RAID 5 Hard Drive Data Protection; 3TB HDD storage; 4 television tuners (2x NTSC, 2x ATSC); 4GB of RAM; and 8-channel analog audio or digital coaxial audio.

On November 8th, the Consumer Electronics Association (CEA®) recognized Niveus Media’s Pro Series – n9 media server as a CES Innovations 2007 Design and Engineering Awards Honoree within the home theater accessory category.
